Here is a graphic preview for all of the Angles Worksheets. You can select different variables to customize these Angles Worksheets for your needs. The Angles Worksheets are randomly created and will never repeat so you have an endless supply of quality Angles Worksheets to use in the classroom or at home. We have classifying and naming angles, reading protractors and measuring angles, finding complementary, supplementary, vertical, alternate, corresponding angles and much more. Our Angles Worksheets are free to download, easy to use, and very flexible. These Angles Worksheets are a great resource for children in 3rd Grade, 4th Grade, 5th Grade, 6th Grade, 7th Grade, and 8th Grade. Click here for a Detailed Description of all the Angles Worksheets. Click the image to be taken to that Angles Worksheets. Classifying Angles Worksheets These Angles Worksheets are great for teaching the different classification of angles. These angles worksheets will produce 20 problems for the student to identify whether the angle is acute, obtuse, right, or straight. Naming Angles Worksheets These Angles Worksheets are great for teaching the correct nomenclature to identify angles and sides of angles. They will be asked to label the vertex and sides of angles and name all angles with a given vertex. These angles worksheets will produce 12 problems. Angle Pair Relationships Worksheets These Angles Worksheets are great for identifying angle pair relationships. The student will identify adjacent, complementary, linear pair, or vertical angles. These worksheets will produce 8 problems per page. Producing Protractor Images Worksheets These Angles Worksheets are great for handouts or overhead projector where a protractor image is needed. You may also print this protractor images on a piece of acetate to make a large size protractor for use in the classroom. These Angles Worksheets will produce one, two, four, or six images of a protractor per page. Reading a Protractor Worksheets These Angles Worksheets are perfect for practicing reading and using a protractor to measure different angles. These Angles Worksheets will produce two problems per page. Measuring Angles Worksheets These Angles Worksheets are great for practicing measuring angles with a protractor. These worksheets will produce 8 problems per page. Drawing Angles Worksheets These Angles Worksheets are great for practicing drawing angles with a protractor. These worksheets will produce 8 problems per page. Identify if a Point is Interior or Exterior to an Angle Worksheets These Angles Worksheets are great for practicing identifying if a point is interior, exterior, or on the angle. These worksheets will produce 9 problems per page. Angle Addition Postulate Worksheets These Angles Worksheets are great for practicing the angle addition postulate. These angle worksheets will produce 9 problems per page. Find Complementary Angles Worksheets These Angles Worksheets are great for practicing finding missing angles from complementary angle pairs. You may select whole numbers or decimal numbers for the problems and configure the worksheet for 9, 12 or 15 problems. Find Supplementary Angles Worksheets These Angles Worksheets are great for practicing finding missing angles from supplementary angle pairs. You may select whole numbers or decimal numbers for the problems and configure the worksheet for 6, 8 or 10 problems. Find Vertical Angles Worksheets These Angles Worksheets are great for practicing finding missing vertical angles from vertical angle pairs. You may select whole numbers or decimal numbers for the problems and configure the worksheet for 6 or 8 problems. Find Alternate Angles Worksheets These Angles Worksheets are great for practicing finding missing alternate angles from various graphs. You may select whole numbers or decimal numbers for the 6 problems that are generated per worksheet. Find Corresponding Angles Worksheets These Angles Worksheets are great for practicing finding missing corresponding angles from various graphs. You may select whole numbers or decimal numbers for the 6 problems that are generated per worksheet. Find All Angles Worksheets These Angles Worksheets are great for practicing finding missing angles on a graph using complementary, supplementary, vertical, alternate, and corresponding angle relationships. You may select whole numbers or decimal numbers for the 6 problems that are generated per worksheet. Arcs and Central Angles Worksheets These Angles Worksheets will produce problems for identifying and working with inscribed angles and arcs. You may select which figures to name, the number of points on the circle's perimeter, as well as the types of figures inscribed in the circles. Inscribed Angles Angles Worksheets These Angles Worksheets will produce problems for identifying and working with inscribed angles and arcs. You may select which figures to name, as well as the types of figures inscribed in the circles. Click here for More Geometry Worksheets This worksheet defines adjacent, supplementary, complementary, and vertical angles. A sample problem is solved, and two practice problems are provided. Students will identify the measures that are indicated. Ten problems are provided. Ten pictures of lines meeting at points are provided. Students will classify all the measures that are indicated. This sheet lines all the different types of classifications that students need to be aware of for this entire section. It makes a great review sheet to have handy. Students will study each graph and find the value and classification that each problem asks for. Six practice problems are provided. Students will demonstrate their proficiency in identifying adjacent, supplementary, complementary, and vertical measures. Ten problems are provided. Students will find and name what is indicated. Three problems are provided, and space is included for students to copy the correct answer when given. This worksheet explains how to name all the pairs of adjacent measures in the picture. A sample problem is solved for you. This worksheets explains how to name the indicated values in a picture. A sample problem is solved, and two practice problems are provided. Students will name the measures all over the place. Ten problems are provided. Ten pictures of measures are provided. Students will find the classifications that are indicated with each picture. Eight pictures are provided. Students will locate what is asked for within each picture. Students will identify a series of different measures and label them. Three problems are provided. Students will study each picture. They will find what is asked of them. Students will find the angle indicated in each problem. Ten pictures are provided. Take your time and find all the asked for measures. This makes for a great take home sheet. Students will practice recognizing adjacent, supplementary, complementary, and vertical measures. Ten problems are provided. Ten pictures of adjacent, supplementary, complementary, and vertical measures are provided. Students will find the measures they are looking for. This worksheet explains how to find the number of degrees in specified angles. A sample problem is solved, and two practice problems are provided. Students will read the description and then determine the number of degrees of each measure. Ten problems are provided. The problems on this sheet will really help you handle and manage word problem in this environment. This worksheet reviews all the concepts that we have learned here. A sample problem is solved and six practice problems are provided. Students will read the description of each angle(s) and indicate how many degrees each contains. Ten problems are provided. This makes for a nice skill review for students. Three problems are provided, and space is included for students to copy the correct answer when given. In this worksheet, we will practice identifying adjacent and vertically opposite angles and using the properties of angle bisectors, vertically opposite angles, and angles around a point to solve related problems. Q3: Determine whether the angles $\angle 2$ and $\angle 5$ are adjacent, vertical, or neither adjacent nor vertical. Adjacent Bneither adjacent nor vertical Cvertical Q4: Determine whether the angles $\angle 4$ and $\angle 6$ are adjacent, vertical, or neither adjacent nor vertical. Avertical Bneither adjacent nor vertical Cdadjacent Q5: Determine whether the angles $\angle 3$ and $\angle 4$ are adjacent, vertical, or neither adjacent nor vertical. Aneither adjacent nor vertical Badjacent Cvertical Q8: Are $\angle 1$ and $\angle 2$ adjacent angles? Q9: Are $\angle 1$ and $\angle 2$ adjacent angles? Q10: Find the sum of the two adjacent angles given in the diagram. This lesson includes 17 additional questions and 99 additional question variations for subscribers.
